

WE BUILD SPACES THAT BECOME PLACES

2021 PRODUCT DECK

WHO WE ARE. WHAT WE DO.

Box Parklets was started in early 2020 to help businesses and municipalities create interactive, modular, functional, and fun spaces that can be rapidly deployed.

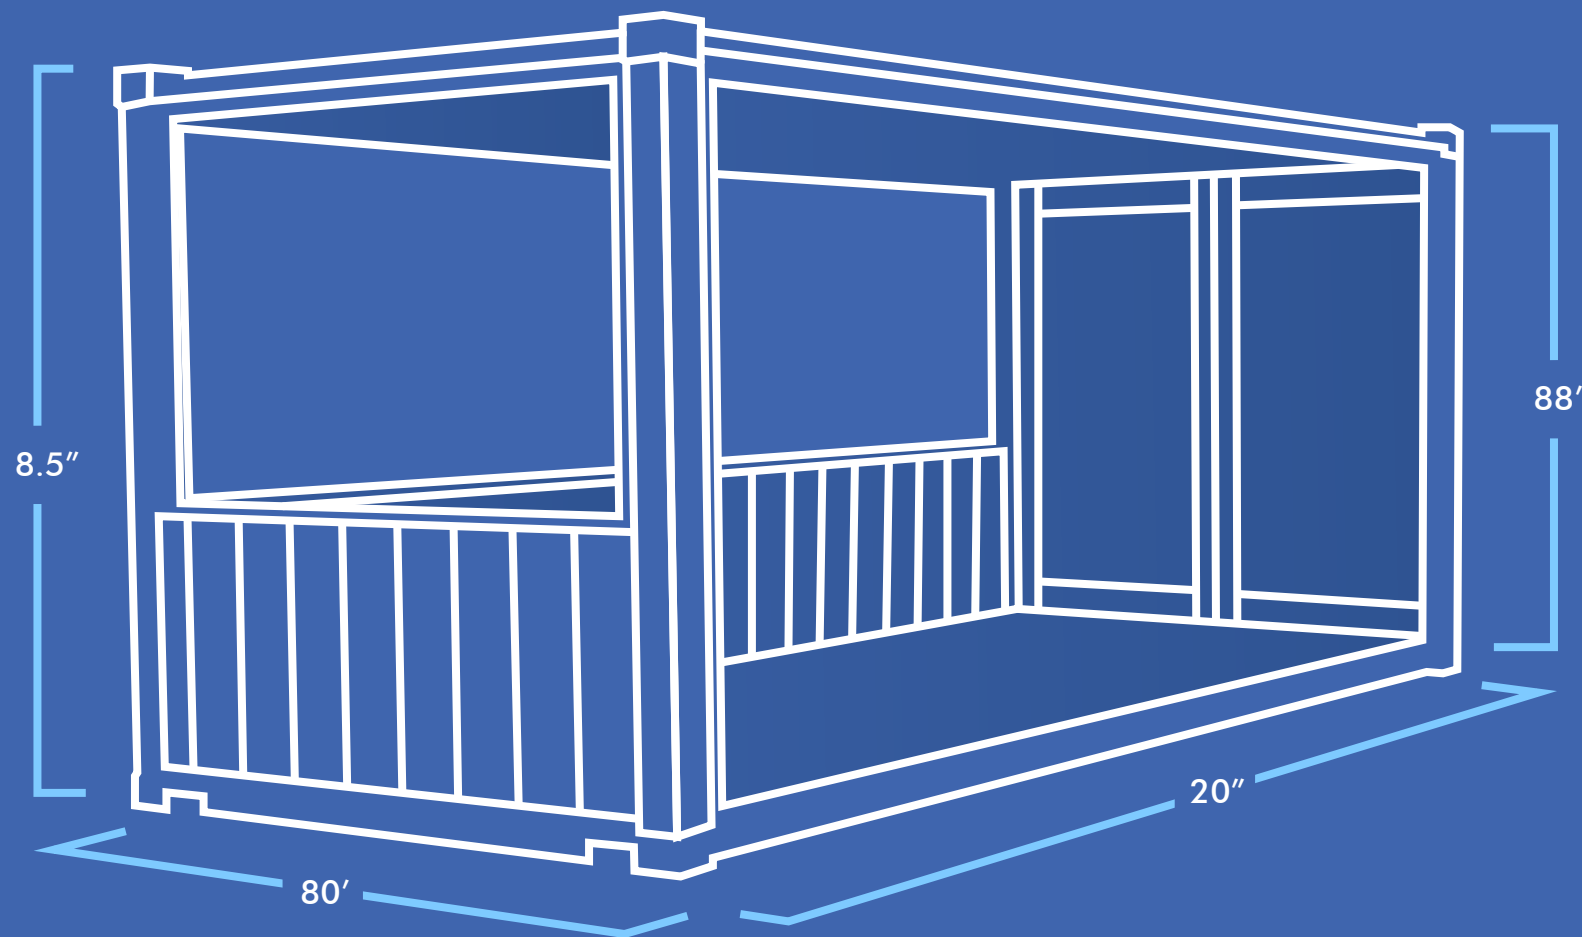

- Box Parklets turn parking spaces, excess sidewalk space, and plazas into destinations for communities and businesses.
- Box Parklets are up-cycled shipping containers possessing the durability to survive all the seasons and weather Canada can throw at them.
- Servicing both the hospitality industry and place making for communities, we aim to turn spaces into places that offer unique experiences.
- With the importance of space the COVID-19 pandemic has instilled in businesses and public alike - Box Parklets offer a concise solution to expanding and increasing the safe interaction of our communities and engagements.

What is a parklet?

- Parklets are public spaces that are deployed in streetscapes and typically occupy parking spaces.
- They can be rest stops for pedestrians, additional seating for hospitality businesses, spaces for communities to socialize, and most importantly are intended to add vibrancy to the streetscape for all visitors.

TWENTY FOOTER

MULTI-UNIT COMBINATIONS

SCALE YOUR PROJECT WITH TWENTY

- Combine multiple Twenty Footer's to suit your needs and location best - create spaces 20', 40', 60' and with distinct orientations.
- Our parklets are stackable and combinable - and have the flexibility to be relocated or rearranged for future uses and projects.

PROCESS

1

GET IN TOUCH

- Contact us to request pricing on our parklets and options. Find our contact below or on our website.

2

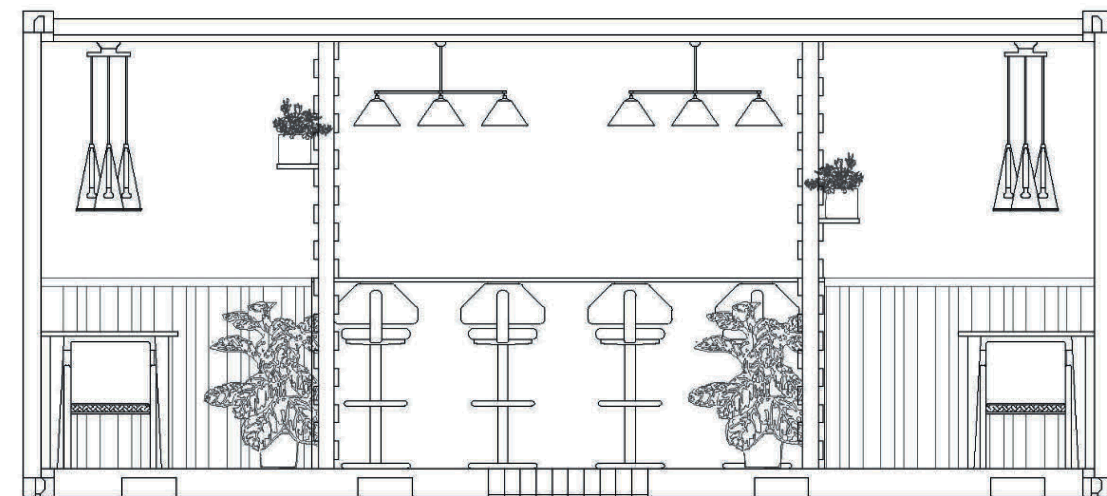

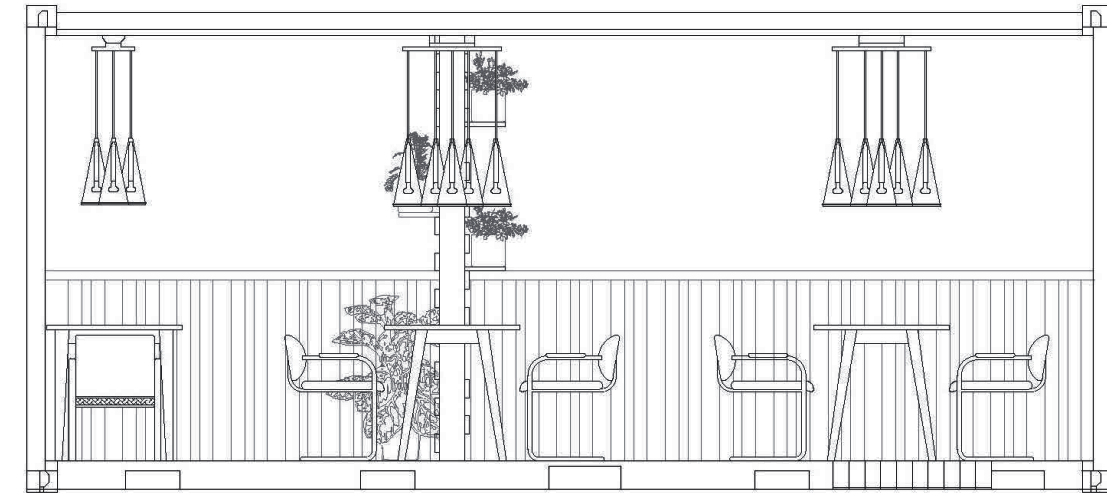

SPECIFICATION

- Determine how many units you need.
- Choose any options you require for your project and paint color.

3

LOCATION

- Deciding where the units will be placed and there orientation in the space in an important consideration.
- Permitting and licensing for the parklet/patio with appropriate authorities begins (we help with this process every step of the way).

PROCESS CONTINUED

4

DESIGN

- Plans are drawn up by our design team for permits and getting the unit(s) leveled and integrated with the site to turn the space into a place.
- Accessibility requirements are addressed.

5

FABRICATION

- Once the unit(s) is spec'd and confirmed we will put them into production.
- Accessibility requirements are addressed.

6

DELIVERY

- Once the unit(s) is completed and the permits are in place they will be shipped and installed with truck and crane.
- Generally, the projects interior furnishings and additional place making will commence once the unit(s) is in position.
